

Study subjects and grades conversion

If you completed your secondary education outside Lithuania or through an international programme (such as Cambridge International, American International School, or International French Lyceum), you need to submit documents so your subjects and grades can be evaluated and converted into the Lithuanian grading system. Please upload copies of the following documents*:

- academic recognition decision for your secondary education (issued by [SKVC](#) or [an authorized higher education institution](#));
- secondary education diploma;
- diploma supplement or transcript (if subjects and grades are not included in the diploma);
- results of any state exams or entrance exams (if not included in the diploma supplement);
- a document proving your eligibility for state-funded studies (such as an ID document, permanent or temporary residence permit in Lithuania, document confirming Lithuanian origin status, or proof of EU/EFTA citizenship or family member status).

*All documents must be submitted as copies of the original. If documents are not in Lithuanian, English, German, or French, official translations into one of these languages are required. The translation must be attached to a notarized or officially certified copy of the document and confirmed with the translator's signature and agency stamp.

Documents issued in countries outside the EU, EFTA, USA, Belarus, Russia, Moldova, or Ukraine may require legalization or an Apostille certificate (more information is available from the Ministry of Foreign Affairs, tel. +370 5 236 2444).
